

GISflow

by in2destination

gets answers to these and many more questions....

- repeating visitors
- explore beyond our main cities?
- beyond the most iconic places?
- visitors mobility patterns
- with higher expenditure
- per day, are different
- from those with tighter budgets?
- do visitors use public transport?

in2
destination
Transforming places

 for the sustainable development of our destinations

 for monitoring the pressure over certain neighbourhoods

 for observing tourism distribution beyond cities and into rural areas

 for evaluating the impact of Cruise passengers over the territory

 for evaluating the marketing strategies

 for obtaining sustainability certifications such as Biosphere Destination Certificate approved by GSTC

...has been tested in:
